

The RISM Catalog

Latest developments and future perspectives

Jürgen Diet and Bernhard Lutz (Bavarian State Library)

Latest developments

- GND and VIAF <u>BEACON files</u> for RISM authority records
- Display of <u>IIIF objects</u>
- Search for new or updated titles
- Linking <u>composite volumes</u> and printed editions
- Restructuring of the holding section
- Integration of new fields and functions (e.g. <u>fingerprint</u> and <u>related source</u>)
- <u>Full display</u> of institutions and secondary literature

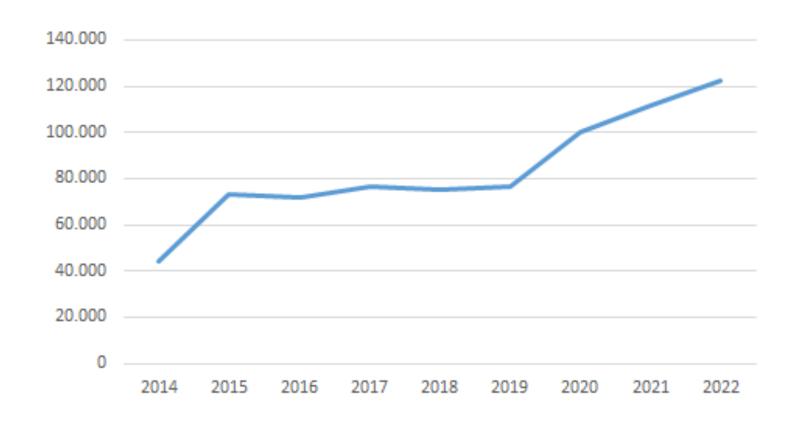

Future perspectives

- Continuous maintenance and system adjustments in exchange with the RISM Editorial Center
- Migration from the discovery system *TouchPoint* to *VuFind* (open source, development via GitHub)
- Integration of the new authority data category work
- Integration of a routine for the inclusion of keywords
- Revision of the incipit search (Workshop, 19 September 2022, BSB Munich)
